

Introducing the Echotec TS 250

The Echotec TS 250 is designed and manufactured to work in the toughest and most challenging environments. Manufactured from HARDOX® and STRENX™ the shear has enhanced performance for thinning, limbing, hedge row maintenance, tree removal, site clearance, loading, gathering and much more. The shear offers optimal and solid performance while offering maximum production and efficiency every time it is used.

The shear has powerful twin arms securing the load in every cut making the shear safe for use in all environments. The shear comes with a custom-made hydraulic cylinder which offers the force behind every cut.

PRODUCT DATA & SPECIFICATIONS

Weight
400 kg

Machine size
5 - 10 T

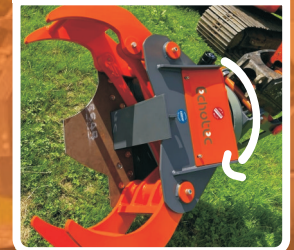

Maximum cut
diameter 25 cm

Working Pressure	275 bar
Oil flow	65-70 litres/min
Grapple opening	800 mm
Hardwood cut diameter	200 mm
Softwood cut diameter	250 mm

UPGRADE OPTION

Add on 360 degrees rotation at any time

The removable blade on the Echotec TS 250 additionally allows it to be used as a grapple making it multipurpose.
